FATHIMA REEHA T.A

3rd Year Student

+91 8848620564 reeha5622@gmail.com Kerala, India

ABOUT ME

Third-year Computer Science Engineering student skilled in Python , currently developing SynCura, an explainable AI-based ICU risk monitoring system for early risk prediction from clinical data,and working on face detection project. Looking for an opportunity to build practical solutions and grow as a software engineer.

EDUCATION

Bachelor of Engineering (Computer Science and Engineering)

PA College of Engineering | 2024-2028

CGPA - 8.3/10

SKILLS

Technical Skills:
- Python
- Java
- SQL
- DSA

SOFT SKILLS:
- TEAMWORK
- PROBLEM SOLVING
- COMMUNICATION

TOOLS & SYSTEMS:
- VS CODE
- CANVA
- GITHUB
- OPENCODE
- ARDUINO IDE

PROJECTS

SynCura - EXPLAINABLE ICU RISK MONITORING SYSTEM

Role: Member

Developed an AI-based system concept for early ICU risk prediction from clinical data, with explainable outputs to support timely alerts.

Focus: Explainable AI, clinical data, early risk prediction.

RAILWAY MANAGEMENT SYSTEM

Role: Member

Developed a system for ticket booking, train scheduling and passenger management to automate railway operations. Reduces manual work and improves efficiency.

HOME AUTOMATION SYSTEM

Role: Member

Developed a system to control home lighting, appliances, and security with automated monitoring.

FACE DETECTION

Role:Solo Build

Developed a face detection application in Python using OpenCV that identifies human faces in images and real-time webcam video, applying image preprocessing such as grayscale conversion and resizing to improve accuracy across varying lighting conditions and multiple faces per frame.

ACHIEVEMENTS

Hackathon Participant | Active EMBED Club Member | IoT & Embedded Systems Activitie
